

ENGenious? Yes we are!

Are you attending the [SPE ENGenious Symposium & Exhibition in Aberdeen from 4-6 September?](#)

We're exhibiting daily on our stand (B01), where we look forward to welcoming you to our interactive AR experience. Be among the first to use our exciting new industrial augmented reality (AR) application R2S AR.

We've even created an event-specific version R2S AR for ENGenious which is available now at the [Google Play Store](#). This release of the R2S AR app has been engineered specifically for the pipework you will find at our stand overlaying detailed information describing it's components and what's going on inside.

But that's not all we're doing...

Throughout the event, we are involved with everything from delivering a symposium presentation to hosting pop up events and supporting the OGTC on its stand too.

Tuesday 4th September

0700 – 0900: **AECC Forbes Suite**

Business Breakfast: digital transformation

We're delighted to be presenting at the opening business breakfast! Our managing director Bob Donnelly will explore how AR technology can reap significant benefits for oil and gas.

1120-1140: Stand B01 (Return To Scene)

Join dynamic Dundee based [Mozenix](#) for a short presentation on exactly what the use of AR means for industry and the trends we are seeing. Mozenix, experts in ARKit and ARCore, is a business committed to helping businesses innovate faster through agile use of emerging technologies. Put your questions to the team.

1300 -1305: Stand C20 (Exhibitor Presentation Area)

We'll be on stage at the exhibitor presentation area on the show floor (C20), presenting on our exciting new developments in AR.

Wednesday 5th September

1120-1140: **Stand B01 (Return To Scene)**

Dundee based [Mozenix](#) will be back on our stand presenting on exactly what the use of AR means for industry and current global trends in this space. Experts from the Mozenix team will be on hand to answer your questions.

1300-1800: Stand B01 (Return To Scene)

Drop past our stand and learn about R2S Self-Capture. R2S provides an incredibly flexible hub for unlimited data sources. What you might not know is that we welcome visual data taken by our clients and in support of this, can even supply an equipment kit to facilitate this process.

1600-1730: AECC Gordon A

We're delighted to have been asked to be part of the symposium, which has an outstanding line up of panels over the course of the event. Our Technical Director, Martin MacRae, and Alex Campbell, MD of our sister company James Fisher Testing Services, will present on AR; *digitally enabling the workforce* in the Symposium session: *Augmented Reality Allowing for More Efficient operations, Less Costly and More Efficient Training*. More information can be found [here](#).

Thursday 6th September

0900-1630: Stand A40 (OGTC)

Join us together with an exciting line up of providers of inspiring technologies being showcased on the OGTC's stand (A40). More information is available [here](#).

1120-1140: Stand B01 (Return To Scene)

Join Dundee based [Mozenix](#) for the final time this week. Experts from the Mozenix team will be on hand to answer your questions on all things AR.

1325-1330: Stand C20 (Exhibitor Presentation Area)

We're back on stage at the exhibitor presentation area on the show floor (C20), presenting on our exciting new developments in AR.
